

Farm Electronics Service Uninterrupted

The Food Supply chain is an essential industry and we would like to reassure our customers that Farm Electronics we intend to remain open as long as we are able, to ensure your continued reliable supply of parts, equipment and service.

The Health, Safety and protection of our staff, their families, and the UK Population is our absolute priority, so we have changed the way we do things to be able to continue to provide our reliable, high standard of service to our staff and customers throughout the outbreak.

During any Site work that must take place, we will be following latest Government Guidance of Site operating procedures and Social Distancing recommendations.

Both collections and deliveries will now be made without physical contact for the safety of our staff and customers.

We are still working hard and fulfilling orders in these times of uncertainty and will continue to do so for as long as possible.

Farm Electronics will remain contactable at all times.

Kind regards,

The FE Team

*Design and manufacture of specialist equipment for vegetable crop storage.
Ambient ventilation, refrigerated cooling systems, electronics temperature control
and automated control panels for agriculture and industry.*
